SUMMARY

Strategic and results-oriented Software Engineer and Certified Microsoft Azure AI Engineer Associate with a specialized focus on Artificial Intelligence Development and Web Application architecture. Proven expertise in architecting production-ready systems using ASP.NET Core, Laravel, and FastAPI. Google Certified Project Manager with a demonstrated track record of leading Agile development teams through the full project lifecycle. Committed to delivering high-impact solutions, including RAG-integrated chatbots, GIS mapping, and secure REST API design to achieve scalable, user-centric results.

WORK EXPERIENCE

Software Engineer | N-PAX Cebu Corporation, Inc.

August, 2025 – Present

- Architected a full-stack Onboarding System featuring a RAG-powered AI chatbot to automate information retrieval and streamline the orientation process for new employees.
- Orchestrated the end-to-end development of a corporate RAG chatbot as a Certified Azure AI Engineer Associate, enabling automated retrieval of company-related data for high-level presentations to company partners.
- Managed an Azure-focused technical team's growth and training while establishing a strategic certification roadmap to achieve Microsoft Solutions Partner status.
- Served as Project Manager for a cross-functional team building a file management platform, handling everything from assigning tasks to technical documentation.
- Organized team schedules and workflows using Agile methodologies to make sure every project I handled was finished on time and project deliverables were met.

Backend Developer | Xpertis Solutions, Inc.

February, 2025 – May, 2025

- Developed the backend user integration of both the parent and admin portal and set up the environment variables for each user profile.
- Handled the overall user authentication for the enrollment portal system, which involved use cases, API usages, and test functionalities.
- Undergone weekly technical assessments during the project development to ensure knowledge retention and enhance technical skills.

Project Manager | Alliance Software Inc.

September, 2024 – December, 2024

- Lead the web development of the SCSHelpDesk application. Ensured each member delivered their assigned task on time.
 - Facilitated the distribution of tasks for all members and coordinated each member's schedule to ensure seamless interaction and execution of each task.
 - Created the overall technical documentation and helped develop some functionalities in the application.
-

EDUCATION

Bachelor of Science in Computer Science

- University of San Jose-Recoletos
 - June 2021 - May 2025
-

PROJECTS

N-PAX Onboarding eXpert (NOX) - Technical Lead | ASP.NET Core, React, FastAPI, SQL Server

- Designed and implemented a full-stack onboarding platform featuring an integrated RAG-powered AI chatbot to automate information retrieval for new hires.
- Streamlined HR workflows by providing automated conversational assistance and personalized onboarding experiences.

N-PAX File Management (Trackquire) - Project Manager | ASP.NET Core, React, SQL Server

- Spearheaded the design of a secure file management platform for company-related document archiving and retrieval.
- Directed database schema design and Entity Framework Core implementation while managing individual task assignments for the development team.

Internship (EnrollME) - Backend Developer | Laravel, SQL Server

- Architected the backend for an education enrollment system, creating secure parent and administrator portals.
- Implemented secure authentication/authorization flows and optimized system performance using DevOps best practices and containerization.

Jumpstart Program (SCSHelpDesk) - Project Manager | C#, JavaScript, SQL Server

- Led a development team in building a web-based ticketing system, overseeing the full project lifecycle from sprint planning to deployment.
 - Managed task distribution and authored comprehensive technical documentation while developing the platform's core knowledge-base functionality.
-
